

# The introduction to the DVN Shanghai Workshop Regulatory Session

To be pre-recorded

18th DVN Regulatory Session

# “High Tech Lighting” Regulation

# Introduction

At the 2019 Shanghai Workshop the regulatory session focussed on:

- Challenges the global industry faces to innovate for improved safety,
- Updating and simplification of the Chinese GB standards,
- Development of the Chinese Vehicle headlamp performance evaluation test method,
- Need for in-laboratory testing of adaptive lighting systems.
- Additionally, the GTB Strategy and Research working groups reported on their activities.

This time we will focus upon the activities of C-GTB, SAC/TC114/SC21 and GTB In the context of:

- the development of the Chinese GB Standards
- the development of regulatory provisions for the innovation of new “hi-tech” lighting functions (including projection of information onto the road to assist the driver and other road users).

Only Chinese experts will contribute to the panel, because we want to listen to the Chinese opinion

# Introduction to the Session and Presentations

Progress of SAC/TC114/SC21 to update GB Standards	Wang Wei
Some Hot topics in the Drafting Process of new GB Regulations on Light Signalling Devices	Zhu Caiping
Current and Planned Research Projects Sponsored by the GTB Scientific Working Group (SVP)	Rainer Neumann
GTB Activities at GRE	Davide Puglisi (Presented by Geoff Draper)
Introduction to the “China Automobile Standards Internationalization Centre (CASIC)”, Geneva	Xie Dongming
Panel Session	
Closure of session
