DVN TOKYO
INTERIOR WORKSHOP
VEHICLE INTERIORS: *WHAT'S NEXT?*

The cabin has evolved far beyond a functional space : it's the **next frontier for user experience**. At Driving Vision News Interiors, we explore how technology, design, and human-centric innovation converge to reshape the future of mobility.

The Holistic Cabin: Where Everything Connects
Moving beyond standalone features, the future lies in a seamlessly integrated cabin. It's where design, HMI, smart surfaces, lighting, seating, and wellness systems work in harmony, with a single goal: to elevate every journey into an exceptional experience.

Driven by Megatrends, Focused on the Human
Automotive interiors are entering a new era, driven by connectivity, automation, EVs, and new regulations. Our conference dissects these forces, focusing on the tangible innovations they spur from advanced displays and driver monitoring to intelligent interiors that think ahead.

Join the Dialogue on Key Domains:
- Keynote about Japan Automotive Interior Trends
- Interior Lighting: Technologies, Materials
- Interior Lighting Design
- Interior Cockpit & HMI: smart surface
- Cockpit display and projection
