# DVN SWEDEN WORKSHOP

## NOVEMBER 18 | NOVEMBER 19

**Gothenburg is one of the most dynamic automotive cities in Europe, with a great automotive ecosystem of OEMs, design studios, tier-1 and -2 suppliers, and universities and research outfits.**

For our first DVN Sweden event, chaired and steered by DVN's Paul-Henri Matha and Andreas Friedrich, we're bringing the lighting and interior sectors together to talk, listen, learn, and facilitate collaboration. Passion for knowledge exchange is central to DVN's mission, and so we are happy to present this event to gather the Swedish lighting and design communities.

The event will focus on exterior design & lighting · lighting technology and innovation, including smart surfaces · UX, CMF and interior lighting, key ingredients for interior design and user experience · Swedish safety expertise & design language, including DMS integration · sustainable design · lighting integration into components · optical & visualisation tools

The event will focus on:

- Exterior design & lighting
- Lighting technology and innovation, including smart surfaces
- UX, CMF and interior lighting, key ingredients for interior design and user experience
- Swedish safety expertise & design language, including DMS integration
- Sustainable design
- Lighting integration into components
- Optical & visualisation tools

Panel discussions will bring diverse perspectives together, engaging on ideas including:

- Lighting regulation (including a discussion with GTB experts)
- Designers & engineers on lighting design, from concept to reality
- *Lagom* (moderation, balance, perfect simplicity) in automotive design
- Round table discussion with Zeekr, Lynk & Co, Polestar, Volvo Car and Volvo Truck heads of design

*Paul-Henri Matha*

*Andreas Friedrich*
