DVN MUNICH WORKSHOP

AUTOMOTIVE LIGHTING, TIME TO RETHINK ?

In a highly competitive landscape shaped by geopolitical tensions, rapid technological shifts and lighting innovation at its maximum pic, it's time to pause, step back and bring the entire lighting community together to shape what comes next.

- Which innovations will define the future?
- Which products and technologies will make the difference?
- Which new ways of working do we need?
- How will AI revolutionize our industry?
- And, above all, how can we work better together?

Let's meet, exchange ideas and shape the next chapter of automotive lighting together.

See you at DVN Munich 2027.

A handwritten signature in blue ink, appearing to read 'pammum', written over a light blue rectangular background.

Paul-Henri Matha

DVN Chief Executive Officer and Lighting General Editor
