DVN AUTOMOTIVE SENSING & AD APPLICATIONS

Automotive interiors are entering a new era, where design, materials, digital technologies, and user experience converge to reshape the relationship between people and vehicles.

Becoming intelligent, sensory, and adaptive environments, cabins must combine brand identity, comfort, safety, innovation, and sustainability while meeting cost and industrial requirements.

DVN Interior Munich 2027 will bring together OEMs, designers, engineers, and suppliers exploring the key transformations shaping tomorrow's automotive interiors.

We will cover the following topics:
- Smart Materials & Surfaces: From Sensory Innovation to Sustainable Production
- Next-Generation Seating: Comfort, Safety & Adaptive Experiences
- Beyond the Screen: Displays, Projection & the Future of Cockpit HMI
- CMXperience: Light, Haptics & Sound Shaping Human Emotions
- The Intelligent Cabin: From AI-Driven UX to Production Reality

See you at DVN Interior Munich 2027!

Laurent Sérézat,
Interior General Editor
